Project Name:- NeuraWell

Platform Preview:-

NeuraWell – AI Mental Sanctuary is a web-based mental wellness platform designed to provide users with a safe and supportive space for emotional well-being, self-reflection, and personal growth.

The platform combines AI-powered conversations with interactive wellness tools such as **Chat Sanctuary, Journaling, CBT Reframing, Mood Trends, Guided Breathing, Soundscapes, and Daily Wellness Quests**. These features help users express their thoughts, understand their emotions, develop healthier thinking patterns, and practice relaxation techniques.

Summary:-

NeuraWell – AI Mental Sanctuary is an AI-powered mental wellness platform designed to support users in managing their emotions, reflecting on their thoughts, and building healthier daily habits. It combines conversational AI with personalized wellness tools such as journaling, CBT-based thought reframing, mood tracking, guided breathing, calming soundscapes, and daily wellness activities.

The platform aims to make emotional support more accessible, interactive, and personalized while encouraging users to develop greater self-awareness and healthier coping habits.

Problem being solved:-

Many young adults experience stress, anxiety, emotional overwhelm, and difficulty managing their mental well-being, but may hesitate to seek professional help due to cost, accessibility, stigma, or lack of immediate support.

Existing wellness solutions often provide isolated tools without offering a personalized and continuous support experience. NeuraWell addresses this gap by providing an AI-powered, accessible platform where users can express their thoughts, reflect on their emotions, and access personalized wellness activities in one place.

The platform aims to encourage early emotional self-awareness, healthy coping habits, and regular self-reflection, while recognizing that it is not a replacement for professional mental health care.

USP (Unique Selling Point):-

NeuraWell stands out by combining AI-powered emotional support with multiple personalized mental wellness tools in a single platform. Instead of functioning as only a chatbot or a collection of wellness activities, NeuraWell creates a more continuous and personalized experience through AI conversations, journaling, CBT-based thought reframing, mood tracking, guided breathing, soundscapes, and daily wellness quests.

Its key USP is the ability to provide context-aware, personalized support that adapts to the user's emotional needs, making mental wellness more interactive, accessible, and engaging.

Key Features:-

- **AI Chat Sanctuary** – Provides supportive, AI-powered conversations for users to express their thoughts and emotions.
- **Smart Journaling** – Allows users to record thoughts and reflect on their emotional experiences.
- **CBT Reframer** – Helps users identify and reframe negative or unhelpful thought patterns.
- **Mood Tracking & Trends** – Tracks mood patterns and helps users understand their emotional well-being over time.
- **Guided Breathing** – Provides breathing exercises to help users relax and manage stress.
- **Calming Soundscapes** – Offers relaxing audio experiences for mindfulness and emotional relaxation.
- **Daily Wellness Quests** – Provides small, meaningful activities that encourage healthy daily habits.
- **Personalized Experience** – Adapts wellness suggestions and interactions based on the user's needs and reflections.
- **Safety-Focused Support** – Encourages users to seek appropriate professional help when serious emotional distress is detected.

Tech Stack:-

Frontend: Next.js 16 (Turbopack), React 19, Tailwind CSS, Framer Motion, Web Audio API, Web Speech API.

Backend: Python 3.10+, Flask, Gunicorn, Flask-CORS.

AI/ML Orchestration: LangChain, LangChain-OpenAI, OpenAI GPT-4o & GPT-3.5-Turbo with Structured Function Calling.

Deployment: Vercel (Frontend Next.js) + Render (Backend Flask SSE Server).
